**“PUMA”**

**Maple Grove, MN** -Modularity at its best, the new Timesavers' Puma series is engineered and designed to be built to match your exact needs. Built on Timesavers' proven "T" rail mounting system, this versatile group of machines makes it easy to choose which of the head types you need for your application, and integrate them into the frame exactly as you need them.

Available in one to four heads, three head types and in 37" and 52" widths, the new Puma series offers you almost unlimited possibilities. Modularity, versatility, ease of maintenance and standard features not offered by our competition makes Timesavers' new Puma series machines not the best choice, but the only choice for your deburring and finishing needs.
